PROJECTS

Credit Rating Dataset — Statistical Analysis

Python · NumPy · Pandas · Matplotlib

- Analysed credit rating features using scatter plots and covariance matrices to uncover variable relationships.
- Computed descriptive statistics (mean, variance, percentiles) and applied Chebyshev's inequality.
- Delivered insights through clean visualisations and a structured report.

Interactive Sales Dashboard — Power BI

Microsoft Power BI · DAX · Excel

- Designed a multi-page Power BI dashboard on a public superstore dataset with dynamic KPI cards and slicers.
- Built time-intelligence DAX measures to track monthly trends and regional sales performance.
- Delivered stakeholder-ready insights on product profitability and revenue breakdown.
